

# King of the Hill Contours Test

1. What is the difference in elevation between 2 thick contour lines on an Ordnance Survey map?
2. What is the correct term for the difference in elevation between 2 contour lines?

The contour \_\_\_\_\_

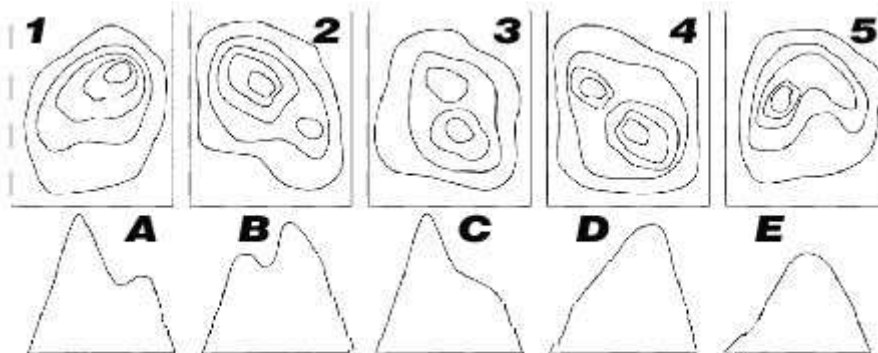

- a) Differential
  - b) Interval
  - c) Increment
3. What do closely spaced contour lines tell us?
    - a) It's a plateau
    - b) Slopes are gentle
    - c) Steep slopes
    - d) The land is completely flat

4. Match the contours to the corresponding land profile

5. Now let's try some a little harder...

Put these landscape profile numbers with their contour profile counterparts

Thank you for taking the test
